

There has been a lot of talk about encouraging more people to move to the NWT (ie transfer payments), as well as keeping people here. What are your thoughts and ideas on how to achieve these things?

Do you have any examples of changes to the NWT Public Service Act that you would be willing to propose or support as a member of the Legislative Assembly that would support UNW members?

Do you support investment in public service workers? Do you support investment in quality programs and services in the public service?

What is your position on ensuring compensation (for example wages and northern living allowance) keeps up with rising inflation and cost of living in the NWT? What is your understanding of cost of living increases?

What is your position on public-private partnerships (P3s), where governments contract out public infrastructure and services to private companies? What is your knowledge and position based on?

Would you use your position as an MLA to help ensure there is more job security for GNWT workers? How would you assist with stopping the misuse of casual employee positions?

There has been a lot of fear of mine closures and how they would affect the NWT. What other creative ideas do you have for improving the economy of the NWT that does not focus solely on mining?
